Routine Disinfection Service

SE Commercial Services hopes to offer our clients the confidence to welcome back staff and customers to a safe and clean environment.

That is why we created our Routine Disinfection Service with a clear outline of What's Included, Why it Works and How Much it Costs.

Our new technology is being utilised by some of the world's biggest brands – we want to make it accessible and affordable to all businesses big or small.

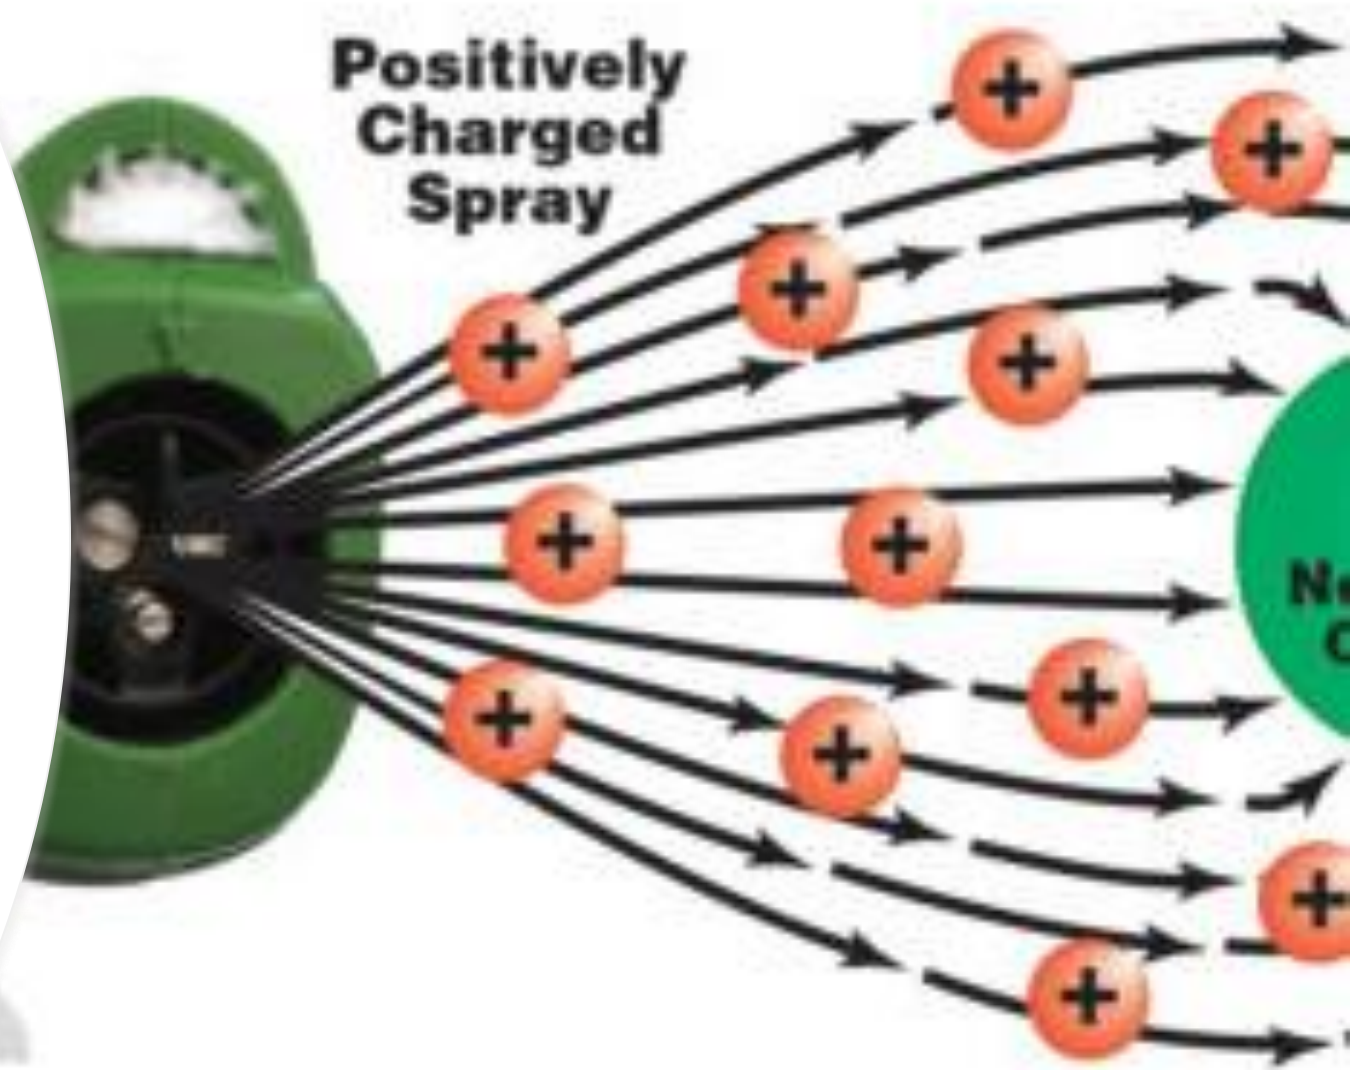

Daily Service - What's Included

- ✓ Initial survey of the premises and a tailored service plan.
- ✓ Monthly Rolling Contract – (we don't want to tie you in longer than is necessary).
- ✓ **Daily** - Manual Cleaning of all Touch Point Surfaces* and any other potentially contaminated surfaces.
- ✓ **Daily** - Full Electrostatic Spray combined with powerful [Viricidal Disinfectant**](#) of all hard and soft surfaces including IT and communications equipment.
- ✓ Minimal downtime – average service 2-hours.
- ✓ Option to include regular [Commercial Cleaning Service***](#)

Electrostatic Spraying: How It Works

- ❖ When electrostatic technology is applied to a liquid disinfectant, the droplets created become positively charged, enabling them to stick to any negatively charged surface.
- ❖ The Electrostatic Spray will quickly and evenly distribute disinfectant across surfaces, including hard to reach places by 'wrapping itself' around surfaces.
- ❖ The Viricidal Disinfectant solution will then remain for the required contact time, killing any pathogens present on the surface.

Some of the brands
already using this
technology.

Price List

Routine Disinfection Service - Daily (cost per week)

Size of Premises (Sq Ft)	Cost per week (5 days)	Cost per week (7 days)
0 - 1000	£200	£280
